

Ilyass Meftal el Menani

FRONTEND DEVELOPER

Frontend developer and software engineering student at 1337, part of the 42 Network, with a strong foundation in programming, problem solving and system development. Experienced in building modern web applications using JavaScript, TypeScript, React, Next.js and Tailwind CSS. Seeking a frontend internship to contribute to real-world projects while continuing to grow as a software engineer.

TECHNICAL SKILLS

FRONTEND

HTML · CSS · JavaScript · TypeScript React ·
Next.js · Tailwind CSS · Responsive Design

TOOLS & ENGINEERING

Git · GitHub · Docker · Linux · Vite C · C++ ·
Bash

PROJECTS

WEBSERV

C++98 · C · HTTP · TCP/IP · Sockets · epoll · CGI

- Developed an HTTP web server from scratch using C++98 and low-level socket programming.
- Implemented HTTP request/response handling, connection management and CGI execution.
- Used non-blocking I/O and epoll to handle multiple client connections efficiently.
- Worked with TCP/IP networking, processes, pipes and Linux system programming.

TRANSCENDENCE

Next.js · TypeScript · Tailwind CSS · UI/UX

- Designed and developed the frontend of a full-stack web application using Next.js and Tailwind CSS.
- Designed the application's user interface and user experience, translating the concepts into responsive - and reusable components.
- Implemented responsive layouts and interactive interfaces across desktop and mobile devices.
- Collaborated with the team to integrate the frontend with the application's backend functionality.

WAQAR — E-commerce Platform

React · JavaScript/TypeScript · Tailwind CSS · Supabase

- Designed and developed a responsive e-commerce platform for a perfume brand using React and Tailwind CSS.
- Built reusable UI components and responsive product interfaces for desktop and mobile.
- Integrated Supabase for data storage and application data management.
- Implemented product and order-related functionality connected to the application's backend services.

EDUCATION & CERTIFICATIONS

1337 — 42

Network Software Engineering
Common Core — Completed

Project-based curriculum covering:

C/C++ · Algorithms · Unix/Linux · Memory Management Processes · Networking ·
System Programming
